

Kitchens + Renovations + Bathrooms

## A Guide to Designing Your Dream Kitchen

---

Today the kitchen is at the heart of every home.

It is considered to be the most important room in the entire house as it is used by every family in many different ways. From cooking and cleaning to studying and entertaining, and even a room to gather and relax together. There are a vast number of different ways to use the same area in a well-designed and planned kitchen.

To assist you with creating your dream space we have put together some key aspects which you should consider during the design and planning of your kitchen.

Our step by step method will ensure that you can make the most out of this precious corner of your home.

Our designers are delighted and ready to assist you with your journey in creating the perfect kitchen for your family's need.

# Design Process

Steps in designing your dream kitchen

## Stage ONE - Free Consultation

### Step 1 - Showroom consultation with Designer

Discuss your dream kitchen and set your renovation budget. Explore kitchen styles, door profiles, benchtops, splashback, flooring lighting and accessories.

### Step 2 - Site Inspection

Our designer will visit your home to take photos & measurements. This is a great time to ask any technical and layout questions.

### Step 3 - Design Inspiration

After visiting your home, our designer will prepare a colour palette and a preliminary design for inspiration towards your dream kitchen.

### Step 4 - Building Inspection

Our builder will visit your home to conduct a thorough site inspection and check measure for design stage.

### Step 5 - Quotation

We will provide you with a quotation within 7 days.

## Stage TWO - Mini Design Explorer (Optional)

Mini design explorer stage caters to those who would like the flexibility to explore the design in-depth before proceeding.

- 2 Hours of design work and personalisation of kitchen plan
- 1 Revision

Mini Design Explorer fee - \$299

Plans or elevations - additional processing fee of \$199

## Stage THREE - Contract

### Step 6 - Quotation Acceptance

On acceptance of your quotation, we will provide a contract outlining all aspects of your project.

### Step 7 - Design Phase

Your designer will commence on your detailed plans for your project covering all aspects of your layout, materials, finishes & colours.

## Stage FOUR - Manufacturing

### Step 8 - Commence production

On finalisation of your design, our team will commence with manufacturing. Production periods are between 4-8 weeks.

## Stage FIVE - Installation

### Step 9 - Demolition

Our construction team will commence demolition of your existing kitchen and prepare for a rough-in of services such as plumbing and electrical.

### Step 10 - Cabinetry Installation

Our cabinet maker and construction team will install all your cabinetry and other renovation items.

### Step 11 - Benchtop Installation

Once all your cabinetry is installed, the fabrication and install of your benchtops will take up to 7-10 days.

### Step 12 - Splashback Installation

Your splashback will be installed on the same day as your benchtop where the material is either tiles, quartz or stone.

Glass splashbacks require final measurements after benchtop installation.

Fabrication will take upto 7-10 days.

# YourStyle

PREFERENCES

## Modern

Whether you're partial towards an all white design or you prefer a pop of colour, there's nothing like a sleek modern kitchen design to suit a modern home.

## Classic

Classic kitchens blend modern design with minimalistic aesthetic creating a space-saving & distinctive characteristic which transcends time.

## Traditional

Defined by intriguing details, the traditional style showcases a rich and luxurious lifestyle - mostly to suit the design of the house being incorporated into.

# Kitchen Layouts

## Configuration Options

### Straight

This design follows a single wall kitchen layout with counter space on both sides of the cooking range to make it easier for food preparation. This layout is ideal in small kitchen spaces.

### L-Shape

Considered as one of the most efficient kitchen layouts for the modern home allowing for easy and efficient work spaces - with appliances and cabinets installed along a right angled wall.

### Galley

It is a modern design which allows the shortest access to all areas of the kitchen with two walls of cabinetry and benchtop parallel to each other. Appliances are usually on one side with cleaning and food prep areas on the other.

### U-Shape

This is a highly coveted kitchen layout as it includes a lot of storage and bench space without hampering the possible inclusion of tall pantries and or fridges at the end. These kitchens can be combined with dining areas or even an island if the space allows.

### Island

The island has multiple features and is highly recommended in any home with a large enough kitchen space. It adds additional work space and can house both appliances and cabinetry.

### G-Shape

The G-Shape kitchen is an altered version of the U-shape layout making the room more spacious and opening out the wall to the nearby room. It is best suited to those who want to use every possible square inch of the kitchen area.

# Profiles +

## Finishes

### Profile vs Flat

Each door can come in three distinct characteristics - Flat, Classic or Traditional. Each of these possess different options in-line with their style.

Flat

Classic

Traditional

**Jamieson**

2mm - Pencil Round

**King**

Square Edge

**Goulburn**

2mm - Pencil Round

**Latrobe**

2mm - Pencil Round

**Thompson5**

2mm - Pencil Round

**Acheron**

2mm - Pencil Round

### Finishes

**2-Pac Paint** : Super hard and durable polyurethane paint finish; Offers the widest range in terms of colour.

**Thermolaminate** : A thin vinyl sheet is vacuum-sealed onto the board; Leaves no edges and very durable.

**Melamine** : Melamine doors and panels are made from resin coated decorative paper bonded onto particle board or MDF.

**Timber** : Solid natural timber.

**Ultraglaze** : Acrylic bonded to MDF

### Colour Options

Whether you are after a modern white kitchen or something a little more 'POP' - our colour options are more than capable of suiting your kitchen design requirements!
